EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Ihnen on or about 3-22-04.

The application has been amended as follows:

Claim 1 (currently rewritten): A method of administering a bioactive agent to cells of a targeted tissue site of a subject which comprises administering to said subject an effective amount of the bioactive agent as a bioconjugate, wherein said bioconjugate comprises the bioactive agent and an organocobalt complex wherein the bioactive agent is covalently conjugated to the cobalt atom of the organocobalt complex through a non-reactive atom in the bioactive agent molecule, and wherein said bioconjugate is actively transported into said cells of said targeted tissue site and accumulates in an inactive form until activated by cleavage of the bioactive agent from the organocobalt complex, and which cells of a targeted tissue comprise receptors for the organocobalt complex that mediate endocytotic activity.

EXAMINER'S REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claimed invention is free of the prior art of record because the prior art of record does not teach or fairly suggest a method of administering to target tissues a bioconjugate of a bioactive agent and an organocobalt complex wherein the bioactive agent is covalently conjugated to the cobalt atom through a non-reactive atom in the bioactive agent molecule, and which bioactive agent molecule is cleaved from the bioactive agent and is activated by cleavage from the organocobalt complex following cellular uptake and accumulation, and which target tissues and cells comprise organocobalt receptors that mediate endocytotic activity and cellular uptake of the organocobalt complex.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S COMMENTS

Adequate representatives of bioactive agents, and non-reactive atoms therein, have been provided in the instant disclosure, including on pages 7-12, 52 and 64 of the specification. Adequate representatives of organocobalt complexes, including covalent attachment of bioactive molecules to the cobalt atom, have been provided throughout the instant specification, including on pages 12-14 and 35-38. The instant invention is enabled for administration to target tissues and cells comprising organocobalt receptors

Art Unit: 1635

because the instant disclosure and the prior art teach the administration of organocobalt compounds comprising vitamin B12 and cobalamin related compounds, including cyano-, hydroxo-, methyl- and adenosylcobalamin, to cells expressing the organocobalt receptors, and which target cells include rapidly proliferating cells (e.g. various neoplastic cells and tumors), bacteria, kidney and liver cells. The uptake of cobalamin related compounds has been manipulated in organisms using nitrous oxide and other pharmacologic agents including vitamin B12 and cobalamin compounds. Administration to target cells in an organism has been taught using intraperitoneal, intramuscular, intravenous and oral administration. Cleavage of bioactive agents from the organocomplex, and conversion from inactive to active agents have been taught throughout the instant specification, including pages 14, 43-47, 52-56, 61-62 and 65-68.

Conclusion

Certain papers related to this application may be submitted to Art Unit 1635 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)). The official fax telephone number for the Group is **703-872-9306**. NOTE: If Applicant *does* submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.
